

Sliding & Swing Auto-Operated Doors:

Securing Your Property & Protecting Your Health

At **Warrior Doors**, we have been successfully designing out security threats for over 20 years.

Now in the age of **COVID-19** we are able to offer secure solutions to **safeguard your customers from the threat of the Coronavirus as they enter your store.**

Our **Auto-operated Warrior Sliding and Swing Doors** provide a secure and contactless entrance solution for customers, allowing them to avoid the possibility of picking up viruses and germs through direct contact.

Contactless Security

Our contactless entrances provide customers entering your store with the start of their luxury buying experience.

Managed solely by you and your team, Warrior Doors' auto-operated Sliding and Swing doors allow you total control, while your customers simply focus on shopping.

Our secure doors can be controlled by a button behind the counter, allowing the operator **total control over the number of people in a store at one time**, enabling them to safely maintain social distance amongst customers.

Additionally, there is the option for members of staff with the responsibility of operating the door to have an **individual fob**. The individual fobs mean that multiple people do not have to touch or press a shared button potentially **safeguarding against the spread of germs or viruses.**

Built to Last, Built to Impress

The Warrior Sliding Door is built with a durable and long-lasting stainless-steel frame, and fit with custom made specialist security glazing – maximizing your store's security without compromising on light or aesthetics.

At Warrior Doors we design all of our security products not only to mitigate threats to your business, but also to blend in with the style of your store. We are able to offer options of polished stainless-steel or any available RAL colour powder coating to make your door and store really stand out.

Keep it Clean

With frequent access in and out of a building its unavoidable that someone will end up touching your Warrior Doors frame or door – inadvertently spreading germs or viruses.

Our powder coated doors and frames can be easily steam cleaned, and those which have polished stainless-steel finishes can be easily be wiped down as well without causing any damage or loss of integrity or security to your Warrior Doors product.

Did You Know...

That auto-operated Warrior Sliding and Swing Doors can be installed as a pair making up an interlocking door solution, providing your customers and staff with an extra layer of security, guarding against the threat of tailgating.

The Warrior Sliding Door is the highest certified sliding security door on the market, tested and certified by LPCB at BRE up to LPS 1175 SR3.
