

Swing & Sliding Auto-Operated Doors:

Helping Protect Your Residents from ASB and the threat of COVID-19

At **Warrior Doors**, we have been successfully designing out security threats for over 20 years.

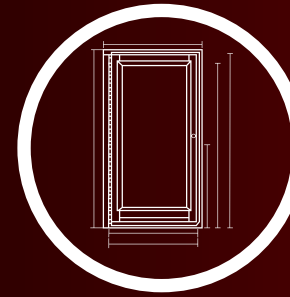

Now in the age of **Covid-19** we are able to offer secure solutions to **safeguard residents in your buildings from the threat of the Coronavirus** as they enter their blocks of flats.

Our **auto-operated Warrior Swing and Sliding Doors** provide a secure and contactless entrance solution for residents, allowing them to avoid the possibility of picking up germs and viruses through direct contact.

Contactless Entrances

Multi-occupancy residencies are always going to be a risk when it comes to spreading viruses and germs. A communal entrance door will be used multiple times a day, typically with many hands touching the door to go in or out.

Our auto-operated swing and sliding doors **do not require residents to physically touch our doors or frames** to gain access or to exit to their building. We utilize modern access control systems that enable a personalized fob entry, in addition to a handsfree sensor which is used in order to exit. **Our secure Contactless Entrances are also great for residents who use wheelchairs or mobility scooters.**

Auto-Operators: Robust & Reliant

At Warrior Doors it is imperative to us that all aspects of our doors are as secure and reliable as can be – this includes our auto-operators too. We have carefully sourced our Swiss made auto-operator of choice, which is powered by a state of the art hi-torque motor. The auto-operators we fit are encased in a Warrior Doors made stainless-steel protective covering to ensure tampering does not take place.

Standing Up to ASB

At Warrior Doors we've got a history of tackling and designing out Anti-Social Behaviour with our secure entrance solutions. We typically fit our stainless-steel doors with anti-bandit glass, to not only provide natural surveillance for a block, but to maximize it's security without compromising on light or aesthetics.

Our requests for call back due to ASB are incredibly low, and every Warrior Door installed in the last 20 years is still in situ.

Keep it Clean

With frequent access in and out of a building its unavoidable that someone will end up touching your Warrior Doors frame or door – inadvertently spreading germs or viruses.

Our powder coated doors and frames can be easily steam cleaned, and those which have polished stainless-steel finishes can be easily be wiped down as well without causing any damage or loss of integrity or security to your Warrior Doors product.

Did You Know...

That our auto-operated Warrior Swing and Sliding Doors are Secured by Design accredited, as well as tested and certified by LCPB at BRE. Our Warrior Swing Door is certified up to LPS 1175 SR4, and our Warrior Sliding Door is certified up to LPS 1175 SR3.
