

## Swing Doors

Manufactured from **high quality stainless-steel** and fitted with state-of-the-art **security glazing**, our Swing Doors have been refined over the years to be as sleek as they are secure.

Our Swing Doors provide a high-security solution for Jewellers and high value retailers looking for a secure first layer of defence.

A swing door is often a great option for a luxury boutique style environment, where a doorman is tasked with manually unlocking the door to welcome customers inside.

For Jewellers and high value retailers, with shop fronts which are quite narrow, a Warrior Doors swing door set can be a **size appropriate security solution** that still enables them to secure their store effectively regardless of space.

The Warrior Doors swing door set has been tested and certified by **LPCB at BRE (up to LPS 1175 SR4)** and have been designed to combat the threat of armed gangs and burglars who may attempt a robbery.

In addition to its robust stainless-steel frame and high-security glazing, our Swing Doors feature a **specially customized locking system** which is unique to Warrior Doors products.

At Warrior Doors we think our products look great, and we believe you will too. Every product we manufacture is **bespoke** and we always **maximise security without compromising on the light or aesthetics of your store.**

If you are interested in our Swing Doors or would like to know more about our range of High Value Retail products, please call us on 0121 706 8400 or email us at [sales@warriordoors.co.uk](mailto:sales@warriordoors.co.uk)
